## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 505 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 505 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. ### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

*In the specification:*

On page 2, line 15, after "MUMPS" insert - - (Multi-User MEMS Processes) - -

On page 11, line 3, delete "501" and insert - - 503 - -

On page 13, line 7, delete "AsGa" and insert - - GaAs - -

The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or suggest a method for manufacturing an actuation system for an optical component from a substrate, the method comprising:

etching a first face of said substrate to form pads,

etching a second face of said substrate to expose a same material as that comprising the pads, thereby exposing a flexible or deformable membrane made of the same material as the pads, and

producing an actuator to actuate the pads and membrane, as in the context of claim 1.

The closest prior art, Bowers et al (US 3,563,106 B1), discloses a method with etching of first and second faces of a substrate to expose a membrane (Fig.8b-8d). However, etching of the first face forms support structures 95 which are not intended to move, rather than forming pads that are actuated with the membrane by the actuator. There is no motivation to modify Bowers to arrive at the cited invention because of the different method steps required and different structure that would result.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

Applicant's arguments, see paragraph bridging pages 11 and 12, filed 1/28/2010, with respect to Mansell have been fully considered and are persuasive. The rejections of the claims have been withdrawn.

It is noted that the use of the phrase "actuation means" in new claim 31 invokes 35 USC, sixth paragraph. Basis for the actuation means is in the specification at page 6, lines 11-15.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art shows methods of etching to form membranes and pads.
